

**Fast. Convenient. Effective.**

LUMIBRITE Chairside whitening is a comfortable, gentle way to whiten, without complicated procedures or harmful UV rays. It's done in your dentist's office and can take as little as one 30-minute session to achieve your desired results. Using a peroxide-based gel, with the option of the Sapphire® Whitening Light for enhanced results, LUMIBRITE Chairside is the fastest way to a whiter and brighter smile.

**Results**

LUMIBRITE Chairside can whiten teeth up to 12 shades and if you follow the simple post-care instructions and practice good oral hygiene, LUMIBRITE Chairside can last for years.

Your whiter, brighter smile awaits!

Every smile is unique. The LUMIBRITE system provides options for every smile to fit your lifestyle and goals.

**Only 3 Minutes A Day**

LUMIBRITE Take-Home Whitening is a proven, easy-to-use, at-home, peroxide-based whitening method. Your dentist will take impressions of your teeth to make soft, fitted trays, which you'll wear at your convenience to apply the recommended whitening gel.

**Results**

LUMIBRITE Take-Home can whiten teeth up to 8 shades and if you follow the simple post-care instructions and practice good oral hygiene, LUMIBRITE Take-Home can last for years.

Frequently Asked Questions

**Q: What causes tooth discoloration?**

Trauma and certain medications, such as tetracycline and other antibiotics, can discolor your teeth. Smoking, drinking coffee, tea or red wine can also cause discoloration and are the easiest to remove.

**Q: Is whitening safe?**

Yes. Teeth whitening has been performed by dentists for decades, supported by research and clinical studies showing that dentist-administered whitening is safe. In fact, it is one of the most widely performed and least-invasive cosmetic procedures available today.

**Q: Are there any side effects?**

Some patients may experience sensitivity during the treatment. If you have very sensitive teeth, it is important to discuss with your dentist the various options to manage sensitivity.

**Q: Can I get my teeth whitened?**

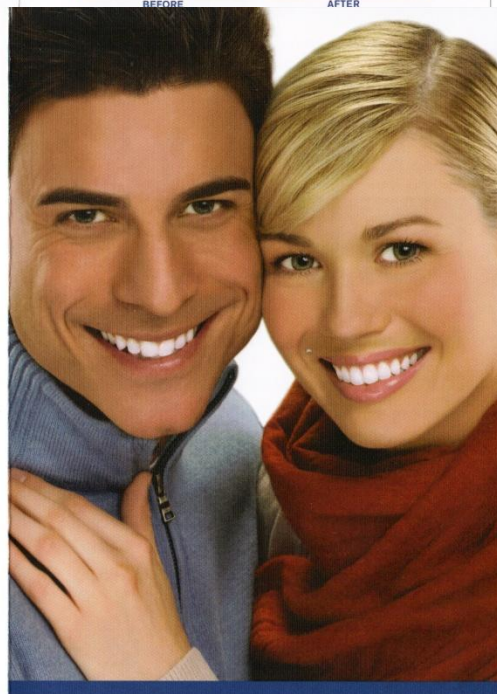

Almost everyone has the ability to get whiter teeth. However, it is important that you talk with your dentist to determine which whitening treatment is best for you.

**The Whitening Alternative**

LUMIBRITE Bleach-Free whitening is the best alternative to peroxide-based whitening and the only option that offers predictable, sensitivity-free results. This in-office procedure is accomplished in just three easy steps: polish, whiten and gloss, and is available in three whitening shades: Natural, White and Supreme White™. With LUMIBRITE Bleach-Free, you'll be ready to show off your new white smile in less than one hour.

**Results**

LUMIBRITE Bleach-Free can give you a predictably white smile, and if you follow the simple post-care instructions and practice good oral hygiene, LUMIBRITE Bleach-Free can last for six months.
